## PROFESSIONAL SUMMARY

Software Developer with 1+ years of experience building full-stack web applications using **Node.js, TypeScript, React.js, JavaScript, PostgreSQL, Python, HTML5, and CSS3**. Experienced in developing scalable REST APIs, backend services, responsive user interfaces, database-driven applications, authentication workflows, API integrations, debugging, and production issue resolution. Strong understanding of software development lifecycle, Object-Oriented Programming, Data Structures, RESTful architecture, Git-based development, and Agile Scrum methodologies.

## TECHNICAL SKILLS

**Programming Languages:** TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3

**Frontend Development:** React.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Responsive Web Design

**Backend Development:** Node.js, Express.js, Python, FastAPI, REST APIs, RESTful Web Services

**Databases:** PostgreSQL, SQL, MySQL, Oracle SQL, Database Design, Query Optimization

**Development Tools:** Git, GitHub, Docker, Postman, VS Code

**Software Engineering:** REST API Development, Full-Stack Development, SDLC, Agile Scrum, Object-Oriented Programming, Debugging, Authentication, API Integration, Code Reviews

**Testing:** API Testing, Unit Testing Concepts, Postman

## EXPERIENCE

### Ahalia International Foundation

Software Developer

Dec 2025 – Present

India

- Develop and enhance healthcare software modules using **Python, PostgreSQL, REST APIs, and Odoo**, following software development lifecycle and coding best practices.
- Design and maintain **REST APIs** and backend services integrated with **PostgreSQL** databases to support scalable healthcare workflows.
- Work on database-driven application features involving **SQL queries, data validation, business logic, API integration, and backend debugging**.
- Collaborate with frontend and backend developers to integrate APIs and deliver customer-focused web application features.
- Troubleshoot production issues, identify root causes, and implement bug fixes and feature enhancements to improve application reliability.
- Use **Git, API testing, debugging, code reviews, and Agile Scrum practices** throughout the development lifecycle.

### Star Knowledge Ventures

Full Stack Software Developer Trainee

Nov 2024 – Dec 2025

India

- Developed responsive full-stack web applications using **Node.js, React.js, JavaScript, HTML5, CSS3, and Bootstrap**.
- Developed and integrated **RESTful APIs using Node.js** for frontend-backend communication, authentication, data processing, and application workflows.
- Built responsive and reusable **React.js components** and integrated backend APIs to deliver interactive web application interfaces.
- Worked with **PostgreSQL and SQL** for database-driven applications, including data retrieval, insertion, updates, relationships, and backend integration.
- Performed application debugging, API testing, troubleshooting, and feature enhancements to improve application functionality, performance, and usability.
- Used **Git, GitHub, Docker, and Postman** throughout the software development lifecycle and participated in Agile sprint planning and code reviews.

## PROJECTS

### Full-Stack Healthcare & AI Assistant Portal — Next.js, Node.js, TypeScript, Python, Prisma

- Built a full-stack healthcare portal using **Next.js, Node.js, TypeScript, Python, and Prisma** to support patient-facing healthcare workflows and AI-assisted services.
- Integrated **Odoo 18 ERP** through custom API bridges to automate patient appointment booking, digital prescriptions, laboratory result delivery, billing summaries, and real-time pharmacy inventory tracking.
- Developed API-driven integrations between the healthcare portal and ERP services to synchronize patient, appointment, prescription, billing, laboratory, and inventory data.
- Implemented reusable frontend components and backend services using **Next.js, TypeScript, Node.js, and Python** with database access managed through **Prisma**.

**Full-Stack Hospital Billing & Health Portal — Node.js, Express.js, PostgreSQL, JWT**

- Engineered a secure full-stack hospital billing and healthcare portal using **Node.js, Express.js, and PostgreSQL** for managing healthcare and billing workflows.
- Implemented **JWT-based role-based access control (RBAC)** for Admin, General Practitioner (GP), and Patient user roles with secure authorization.
- Developed digital prescription management and bill tracking features to streamline patient healthcare and billing operations.
- Implemented automated **audit logging** to track user activities and maintain accountability across critical healthcare and billing workflows.

**Full-Stack Clinical History Portal — React.js, Node.js, Express.js, PostgreSQL, Odoo ERP**

- Built a responsive full-stack clinical history portal using **React.js, Node.js, Express.js, and PostgreSQL**, integrating with **Odoo ERP** to aggregate multi-center patient records.
- Implemented regional **role-based access control (RBAC)** to provide secure, location-specific access to patient and clinical information.
- Developed real-time vital and ophthalmic diagnostic alerts to help surface important clinical updates during patient visits.
- Implemented interactive visit timelines and dynamic temporal log synchronization to consolidate and track patient history across multiple healthcare centers.
